Global Health Catalyst Summit At Harvard Medical School

On March 20-21 2015, the Patcha Foundation actively participated in the GHC summit where the President, Stella-Maris Adamu's presentation was on cancer in Cameroon and the foundation's impactful advocacy work.

A summary of her presentation has been solicited for a monograph publication.

The Patcha Foundation also gained better visibility among its peers, networked and made some important relationships that are essential to our work since we believe strongly that the fight against cancer is every one's fight, and only together can we win.

**The Brand of Care That Makes a Difference
Together, Let's Fight Cancer and...WIN!**
